Re: MGMA Letter of Support for The Doctors Not AI Act (H.R. 10210)

Dear Representatives Barrett, Carter, Landsman, and Schrier:

The Medical Group Management Association (MGMA) thanks you for supporting medical groups' ability to offer high-quality, cost-effective care and for introducing the Doctors Not AI Act of 2026 (H.R. 10210). With a membership of more than 60,000 medical practice administrators, executives, and leaders, MGMA represents more than 15,000 medical group practices ranging from small private medical practices to large national health systems, representing more than 350,000 physicians. We are pleased to support this bipartisan legislation to ensure that coverage denials involving clinical judgment are made by qualified, licensed health care professionals, not artificial intelligence (AI).

At MGMA's recent annual conference, we discussed this legislation with our members and heard concerns that health plans' use of AI tools can contribute to rapid, high-volume denials of prior authorization requests and claims, adding administrative burden and delaying patient care. AI holds real promise for health care, but it should support clinical judgment, not replace it. We also support the bill's transparency provisions: when AI is used in a denial, health plans would have to disclose that use and identify the professional who made the decision.

MGMA looks forward to working with your offices to advance this legislation. If you have any questions, please contact Samantha Meklir, Associate Director of Government Affairs, at smeklir@mgma.org or 202-293-3450.

Sincerely,

/s/

Anders M. Gilberg
Senior Vice President, Government Affairs
